

o elysambre NATURAL MAKE - UP

Do not throw any more, refill your products!

 In its will to offer you the best quality while respecting the environment, Elysambre created a completely refillable line of natural make-up.

This unique and very easy to implement advantage will enable you to carry out pleasure, ecological, respectful and intelligent purchase.

The technical , the quality and the beauty of the materials used, will allow Elysambre products to always accompany you over the years.

Thanks to the refill system, you will
perform, with pleasure, a reflective
and economical purchase.

We pledge:

To offer you an innovative, original **skin-care make-up** line that combines **natural ingredients** and **up-to-date technologies** and to **respect** quality, environment, human relations and animals while bringing you total comfort and **full satisfaction**.

Natural

Elysambre aims at **combining up-to-date technologies** with the clearest, most transparent use of any raw material that **nature** has to offer. Each product description will give you the opportunity to judge the **quality of our composition** for yourself. You will find the **list of the main plant-based active ingredients** as well as our promise not to use any harmful ingredients.

Organic

To the greatest extent possible, **we use organically-grown plant-based** active ingredients, which make our products outstandingly **effective**. Organic active ingredients are grown in wide-open spaces without chemical fertilizers. The plants are not harvested until they have reached maturity. They are cultivated on **managed, controlled and respected land**. Elysambre offers you some products with the **Ecocert** label. Ecocert SAS BP47 – 32600 L'isle Jourdain.

Pro

A process called **micronisation** enables us to create products with **professional quality pigment contents**. You will enjoy bright colours without the professional make-up application difficulties.

Micronisation consists in **grinding the material by compressed air**, thus resulting in

spherical particles that are **nine times thinner than ordinary powders**. The aim of this process is to offer you an **unequaled quality, easy spreading**, effective and **easy application, perfect hold** and really astonishing comfort. You'll achieve comfortable, user-friendly and fabulous natural results **without any excess material**.

To respect nature

To **remain in step with nature**, Elysambre has developed its packaging and display stands with **often-recycled and always-recyclable materials** such as wood, metal and cardboard.

To respect people

Respecting people means having **consideration for those we come into contact with everyday**. That is why we care so much about respecting ourselves as well as our consumers, customers, employees and suppliers.

For an even fairer commercial approach, Elysambre is permanently looking for networks that are available to provide us products from Fair Trade (FT) such as sesame oil, Kalahari melon oil and baobab oil.

To respect animals

Elysambre products are **tested on volunteers** under the **monitoring of an independent laboratory** and never on animals. **We never use pine marten bristles** to make our brushes because those animals do not live well in captivity.

The United Nations World Commission on Environment and Development Brundtland report defined sustainable development in 1987 :

“Sustainable Development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.”

Eye Shadow
